## HEALTH ALERT: CONJUNCTIVITIS “PINK EYE” OUTBREAK

Ministry of Health wishes to advise the public of an increase in Conjunctivitis also known as “pinkeye” which involves inflammation of the eye. We encourage you to take the necessary steps in order to avoid the spread of this bacteria.

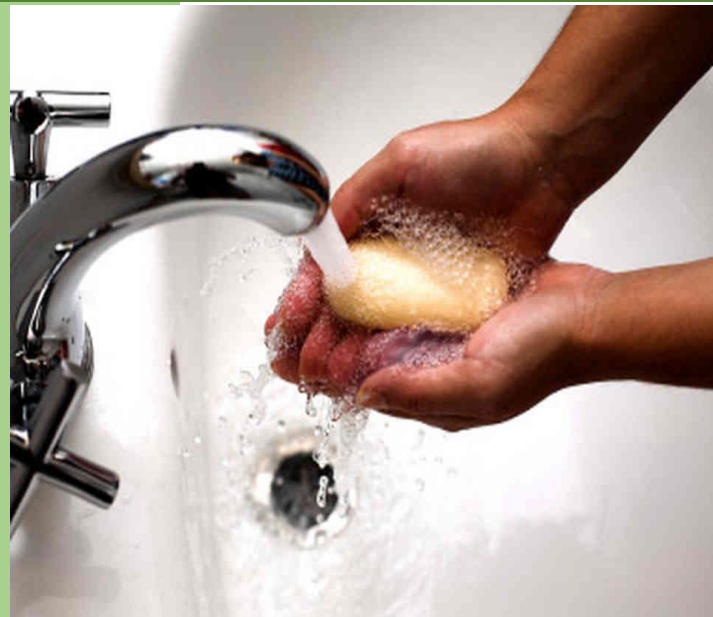

### HOW TO IDENTIFY CONJUNCTIVITIS:

You can identify Conjunctivitis by noticing redness, swelling, itching, a watery or “pus like” discharge, resulting in sensitivity to light and blurred vision in the eyes.

### TO PREVENT THE SPREAD PERSONS ARE ENCOURAGED TO DO THE FOLLOWING:

- Practice frequent hand washing
- Avoid shaking hands with others
- Keep your hands away from your face
- Change your pillowcase and towels daily
- Avoid sharing products such as make-up and wash cloth
- Stay away from work, school and public places until the infection clears
- Use medication as prescribed by your Physician

**If you think you have experienced these symptoms, please contact your Health Care Provider or the nearest Community Clinic.**
